Hard working Software Engineer that loves working on things which make the world a better place. Seeking a dedicated and passionate team that takes pride in their work to which I can contribute towards. I love learning new technology and taking on new challenges.

Skills

- Java, CSS, HTML, JSP
- SQL, Apache Cassandra, JavaScript
- LaTeX, Apache Velocity, JQuery
- Spring MVC, Dojo, JQuery-UI

[**Tools**] git, svn, Maven, Postgres, MySQL, Tomcat, JBoss

[**Skills**] Agile Methodoligies, Continuous Integration, Test Driven Development

Experience

► **TechFlow, Inc.** (Mar. 2013 - Present)
Application Developer

- Software Developer for the User Experience Team
- Redesigned and implemented the new GSA ASSIST website using CSS, JavaScript, JQuery, HTML and Apache Velocity
- Helped design and implement a quick-nav, modal popups, a left-hand nav, and indicators to the user of which page they are on via menu selection.
- Became familiar with and programmed using JavaScript, JQuery, JQuery-UI, Dojo, HTML, CSS, Apache Velocity, Java, Spring MVC
- Worked with JBoss EAP 5.1.2 and JBoss EAP 4.3
- Joined the first team at TechFlow to execute agile methodologies
- Participated in daily scrums and biweekly sprint reviews

► **CUBRC, Inc.** (Aug. 2012 - Mar. 2013)
Software Engineer

- Software Developer for IntellEx, a component for the Command and Control Rapid Prototyping Capability (C2RPC)
- Participated in MTC2, a project to bring C2RPC to a "program of record"
- Worked on deployment and configuration of our software JBoss
- Was the liaison between our costumer in San Diego and our developers in Buffalo, NY
- Programmed using an internally developed language similar to Prolog which ran on a JVM
- Participated in our daily scrums and our biweekly sprint reviews
- Clearance : Secret

► **Space and Naval Warfare Systems Center, Pacific** (Jul. 2009 - Aug. 2012)
Computer Scientist

- Lead Government Software Developer for the Open Track Manager (OTM), a primary component for the Command and Control Rapid Prototyping Capability (C2RPC)
- Lead Software Developer for the Future Movement Service
- Occasionally led a small team of software developers to complete tasking
- Used Tomcat 6, MySQL, and Apache Cassandra for software
- Constructed unit tests using JUnit to our legacy system when refactoring functionality
- Constructed a few RESTful interfaces by constructing ATOM feeds of our data
- Practiced Agile Methodologies, Continuous Integration, participated in daily scrums and experimented with Test Driven Development
- Clearance : Secret

EDUCATION

► **University of Rochester** (2006 - 2009)
B.S. in Mathematics, with Distinction
B.A. in Computer Science, with Highest Distinction
Minor in Philosophy

- GPA 3.57

► **Monroe Community College** (2003 - 2006)
A.A with Honors in Liberal Arts

- GPA 3.92

CERTIFICATIONS

► Oracle Certified Professional, Java SE 6 Programmer (SCJP, OCPJP) (Oct. 2013)

► Windows Server 2008 Active Directory, Configuration (Feb. 2012)

► Windows Server 2008 Network Infrastructure, Configuration (Jan. 2012)

► Windows 7, Configuration (Oct. 2011)

► CompTIA Security+ (Jul. 2011)
